SUBJECT : Georgetown Steam Plant
Underground Tank Removal
Specification No. 2909

October 13, 1988 site inspection of Georgetown Steam Plant revealed that the entire scuffed area of the job site was either filled with five to six foot high piles of excavated material or driven over by heavy equipment. It was also noticed that the excavated material was brought in from Boeing Plant and was being dumped at the site by Boulevard Excavation Company (telephone number 762-0650).

These activities wiped out the entire area which was recently reseeded by our Contractor on September 28, 1988.

Please be advised that the Contractor, Virginia Seitz Construction Company, Inc. has completed the project and shall be released from further responsibilities of maintaining the seeded area.
